## WORK EXPERIENCE

### Full Stack Developer

**Timothy Molina**

📅 Jan 2021 - current      📍 Kissimmee, FL

- Developed a modern booking platform using JavaScript, React, HTML, CSS, Express, and Node.js, driving a 40% profit increase and a significant boost in customer engagement and inquiries.
- Enacted user-centered design principles to achieve a 20% rise in customer satisfaction, refining the booking process for seamless interactions.
- Implemented inclusive design by ensuring universal accessibility, catering to diverse user needs, and expanding customer reach and impact.
- Strengthened online presence, resulting in a notable 50% surge in customer inquiries and a 50% increase to customer retention rates.

### IT Operations and Support Manager

**Noemi's Specialty Catering**

📅 Dec 2017 - Dec 2019      📍 Belleville, NJ

- Led a small team of 3 service professionals, providing efficient store operations leading to enhanced customer satisfaction.
- Coordinated the setup of in-office computers across 2 departments, ensuring a seamless integration process.
- Resolved an average of 10 computer issues per week, addressing technical challenges to minimize downtime, improving productivity by 30%.
- Implemented hardware and software changes during weekly maintenance windows, contributing to a 15% decrease in system errors, ensuring smooth business operations.
- Diagnosed and repaired network malfunctions including file deletion, failed account entry, and 3rd party software compatibility issues.

## PROJECTS

**CampFinder - Yelp-style review site focusing on campsites and hiking trails**

**Timothy Molina**

📅 March 2021 - June 2021

- Developed the web application with Node.js and JavaScript, using Express serving a REST API with HTML/CSS and React serving as the front end.
- Implemented MongoDB as the database to hold user information such as passwords, usernames, email, and written reviews.
