Professional Experience

Web Developer – Timothy Molina – (Achievements based on latest client) 01/2021 – Current
Jersey City, NJ

- Developed and designed a responsive, informational booking site using modern design tools and technologies, including HTML/CSS, JavaScript, Express, and Node.js.
- Orchestrated a seamless user experience by translating client requirements into a user-centric design that incorporated industry-wide technology trends and best practices; reduced user errors by 25% and increased user engagement by 30%
- Assessed UX and UI design for technical feasibility and implemented user-centered design principles to enhance the overall usability of the site.
- Increased online visibility, resulting in a 50% increase in customer inquiries, and a 40% increase in customer retention.

IT Operations and Support Manager - Noemi's Specialty Catering 12/2018 – 12/2019
Belleville, NJ

- Lead a team of service professionals to provide store operations and POS (point-of-sale) hardware and software solutions.
- Collaborated with other managers to set up computers used in-office.
- Assessed and troubleshooted computer problems brought by employees, users, and business owner.
- Provided support for hardware and software changes during weekly maintenance windows.

Education

Pennsylvania State University **State College, PA**
Bachelor of Science in Labor Relations 08/2016 – 05/2020

Projects

Tenzies Dice – React, JavaScript, HTML/CSS 09/2022 – 10/2022

- Developed a web app using React as the front end, along with JavaScript, HTML, CSS.
- Implemented advanced CSS/SASS/React techniques in order to develop a solid foundation in modern UX/UI (user-experience) design.

CampFinder – Node.js, JavaScript, HTML/CSS, Express.JS, MongoDB 03/2021 – 06/2021

- Developed a full-stack web application with Node.js and JS, using Express serving a REST API with vanilla HTML/CSS serving as the front end.
- Implemented MongoDB as the database to hold the user's information such as passwords, usernames, emails, and more.
- Used Render as the platform to deploy my web app.
