### Key Skills

#### Languages –

- HTML, CSS/Sass, JavaScript (ES6+)
- Ruby (Beginner)
- Currently learning Java

#### Frameworks –

- Express, Node.js, and currently refining skills in React/Angular.

### Objective

Recent graduate with education and work experience in Labor & Employer Relations and Web Development. Highly poised and dedicated with talent in design principles and programming languages. Excellent eye for visual aesthetics paired with insight into data and frontend/backend functionality.

### Professional Experience

April 2021 - Current

#### Freelance Web Developer • **Strictly Nails**

- Provide maintenance for the general structure of the site, including the front end and back end, working with a variety of languages and frameworks, such as HTML, CSS, JavaScript, Express, and Node.js
- Assessed client requirements and wove them into the site, such as email capability using Node.js.
- Selected the general design and the color palettes of the site in order to create an aesthetically pleasing environment for users.
- Applied general design strategies and market research in order to attract and keep users on the page when implementing the front end.
- Handled end-to-end written and verbal communication in regards to hosting companies and the client themselves.

December 2018 – 2019

#### IT Support • Noemi's Specialty Catering

- Provided IT services in making sure everything was up and running daily, as well as issuing support when needed on the fly. Conducted research into costs whenever the need arose in the event of upgrading systems, equipment, software, and hardware.

### Project(s)

**CampFinder** – Personal web app built with Express and Node.js as a “playground” in order to expand on new things learned. There is an emphasis on visuals for “users” to find, review, add, and edit campsites to their liking, with a focus on the backend, working with MongoDB.
